## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-3, 5-11, and 13-16 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The instant application is directed to an intervehicular alarm system for transmitting and receiving alarm information between a transmitting vehicle and a receiving vehicle. Each independent claim identifies the uniquely distinct features including "an operating unit for operation by a user of the transmitting vehicle for specifying from a plurality of types of alarms (the alarm sound is a horn, that is a klaxon, or a voice sound is "stop", or "look out" as stated in the remarks) a type of alarm information; and transmitting means for transmitting said position information and said type of alarm information". This patentable distinction is included in all independent claims 1, and 9. The closest prior art, Asami et al. (US 6,252,520) and Watanabe (US 5,450,057). Asami et al. disclose a system for communicating between traveling vehicles and exchanging the information, and Watanabe discloses a system for warning a driver of a vehicle by means of sound image formed according to the detected object around a vehicle. The references, either singularly or in combination, fail to anticipate or render the above limitations obvious.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
